RC 5700 Series

Technical Information

Standard Equipment

- Crown's Access 1 2 3® Comprehensive System Control
- e-GEN® Braking System with automatic parking brake
- Intrinsic Stability System®
 - Travel speed reduction and appropriate brake control when forks are above free lift
 - Forward tilt interlock above staging
 - Controlled tilt speeds
 - Counterweight exceeds required standards
 - Cornering speed control
 - Ramp hold
 - Ramp speed control
- FlexRide® Suspension
- Operator compartment
 - Crown flexible side stance
 - Padded back support with integral side restraint
 - Premium rubber floor mat
 - Padded arm rest
 - Operator console with desk top work surface and storage
 - Entry Bar® safety switch
 - Posture relief step
- Multi-task control handle
- Tilt position assist
- Crown display

- Battery discharge indicator with lift interrupt and re-key feature
 - Hour meters / travel distance / stop watch
 - Pin code access capable
 - Event code display with five (5) key navigation
 - Access 1 2 3 diagnostics
 - P1, P2, P3 Performance tuning
- AC hydraulics and on-demand steering
 - 36-volt system
 - 350 amp battery connector
 - InfoPoint® System
 - Color-coded wiring
 - Battery rollers
 - Dual 10" (254 mm) cushion steer tires
 - Large 16" (406 mm) cushion drive tires
 - Crown-manufactured drive and lift motors
 - High visibility power unit
 - Radial design overhead guard with third post
 - High visibility mast with in-line hose routing
 - Hydrostatic power steering
 - 5° forward tilt
 - 48" (1220 mm) high load backrest
 - Reverse steering
 - Hoist-travel interlock
 - Auto power down

Optional Equipment

- Factory installed attachments
- Load backrest heights
- Fork lengths
- Polished and tapered forks
- Power Sources
 - Lead acid
 - V-Force® Lithium-Ion Ready
 - Thin Plate Pure Lead Ready
 - Fuel cell ready
- Lead acid battery fast charge (dual battery cables)
- Drive and steer tires
- Overhead guard heights
- Drive-in rack overhead guards
- Suspended floorboard
- Adjustable armrest
- 2 5/8" (67mm) radius steer tiller
- Forward steering
- Quick disconnect hydraulics
- Electronic pressure regulator
- 5th hydraulic function
- Visual warning devices
 - Floor spot lights
 - Floor line lights - side lights only
 - Floor line lights - side and rear lights
 - Flashing lights
- Work lights

- Dome light
- Audible warning devices
 - Travel alarms
- Work Assist® Accessories
 - Operator fan
 - Clip pad and hook
 - Clamp
 - Mounting plate
 - Shrink wrap holder
 - Cup holder
 - Pockets
 - Organization kits
 - Desktop clip pad
- Chain slack detection
- Keyless on/off switch
- Fire extinguisher
- Accessory cable (36V)
- Uninterrupted power supply
- Counterweight for RC 5755-40
- Knee pad
- InfoLink Ready
- Productivity package
- Environmental packages
 - EE Rated
 - Corrosion package
 - Freezer package

Operator Compartment

Soft, rounded surfaces make the compartment interior more comfortable. Streamlined exterior smooths entry/exit for the operator.

A low floor height, (9.5" [240 mm]) first greets the operator. A patented FlexRide suspended floor provides a comfortable ride for a wide range of operators. A footrest provides postural relief during stationary tasks, complementing the largest floorboard in its class.

Crown's flexible side stance allows the operator to change positions to increase comfort and productivity.

The Entry Bar™ safety switch with sensors to automatically slow truck travel, encourages safe foot positioning inside the truck.

The Multi-Task Control Handle naturally bridges Crown's current and past designs. Intuitive operation is increased, reducing the learning curve. Blending of hydraulic control functions and traction can improve productivity. Control handle activation forces are reduced. Soft grip steer tiller with hydrostatic steering reduces operator fatigue.

Operator visibility is improved with:

- Low-profile sculpted power unit
- High visibility mast
- Angled overhead guard post and placement
- Radial design overhead guard
- Flexible side stance

Crown Drive System

Crown has applied the latest generation AC drive system, enhanced with Access 1 2 3® technology. The demand for high efficiency systems that closely match customer torque requirements is met with this generation control system. Crown-manufactured, independently controlled, AC drive motors are specifically designed to optimize system integration between the traction and braking controls.

Crown's Access 1 2 3 technology provides optimum performance and control by offering a communication interface for operators and technicians, intelligent coordination of lift truck system and simplified service with advanced diagnostics.

The Crown display is used for easy troubleshooting, access service history and set performance features. A distribution panel is conveniently located with all test points, control fuses and central wiring for easy troubleshooting.

Three modes of performance can be selected to accommodate operator experience or application requirements.

e-GEN® Braking System

Variable regenerative motor braking is optimized and virtually eliminates brake maintenance. The appropriate amount of stopping force is applied to match operator brake input and the current operating conditions of the truck.

The closed loop Access 1 2 3 traction control will keep the truck static until a travel input is requested, even when operating on a grade.

Automatic electric parking brakes activate when the operator releases the brake pedal, a travel input has not been requested or battery power has been disconnected.

Steering

Load-sense hydrostatic steering is an on-demand system which reduces energy consumption. Smooth, quiet steering control with minimal operator effort required at the steer tiller. Steer tires rotate 182° for maximum maneuverability. Crown's hydrostatic steering system is simplified with significantly fewer parts, thus reducing maintenance requirements.

Hydraulics

The hydraulic system provides continuous filtration. A pressurized steel hydraulic tank reduces oil misting and contamination. Hydraulic attachments can be added easily in the field.

Hydraulic manifold is mounted on the mast reducing the number of hoses and fittings.

Ram displacement type lift cylinders and two double acting tilt cylinders are Crown-manufactured. All rams and piston rods are hard chrome plated to reduce pitting and extend cylinder packing life. O-ring face seal fittings are used to eliminate leaks.

Mast Assembly

Crown-manufactured mast assembly utilizes a "flush-face" interlocked I-beam design to improve visibility and reduce truck length. Roller bearing studs are welded on both sides of the rails for maximum strength and roller bearings are canted to run in the thick cross section of the rail. Tie bars wrap around the rails for added strength and to resist off-center load forces.

"In-line" hose routing opens up visibility. Cylinders are placed to the sides to create a high visibility design.

The mast has four points of attachment to the truck for good load force distribution. Two mounting points are at the frame, where tilt cylinders attach. Tilt cylinders use spherical bushings to resist off center load distortions. Two large diameter studs secure the mast to the drive units.

Drive Units

Two Crown-manufactured independent double reduction planetary gear drives offer 27 to 1 gear reduction. The first and second reduction use helical gears for low noise and efficiency. The drive unit gears are splash lubricated in an oil bath.

Carriage

An ITA Class II carriage is standard. An optional hook type ITA sideshifter or other attachments are easily added. Optional fork lengths are available.

Warning Device Options

Audible or Visual Alerts

Safety considerations and dangers associated with audible travel alarms and lights include:

- Multiple alarms and/or lights can cause confusion.
- Workers ignore the alarms and/or lights after day-in and day-out exposure.
- Operator may transfer the responsibility for "looking out" to the pedestrians.
- Annoys operators and pedestrians.

Other Options Available

Contact factory for additional options.

Dimensions and performance data given may vary due to manufacturing tolerances. Performance is based on an average size vehicle and is affected by weight, condition of truck, how it is equipped and the conditions of the operating area. Crown products and specifications are subject to change without notice.

You can count on Crown to build lift trucks designed for safe operation, but that's only part of the safety equation. Crown encourages safe operating practices through ongoing operator training, safety-focused supervision, maintenance and a safe working environment. Go to crown.com and view our safety section to learn more.
