

CROWN

SC 6200 SERIES

The concept is simple. Getting it right is the hard part.

Counterbalance trucks rely on a simple balance concept. When it's done right, operators are more confident, risks are reduced and work flows smoother. The SC 6200 Series incorporates more than just basic physics however. Attention to detail, advanced engineering, a solid foundation and task-focused ergonomics — that's the ideal balance you find on the Crown SC 6200 Series.

Crown gives you more value and versatility in a multipurpose truck. Tailor the SC 6200 Series to meet your needs. You can choose from 3-wheel and 4-wheel models with capacities from 1.3 to 2.0 tons. Each gives you a distinct

edge on stability and manoeuvrability. Optimise further with options for controls, lights, accessories and more.

SCF 6240
Hard Cabin

SCT 6210

SCF 6200 Four-Wheel Counterbalance

- **Load Capacity**
1.6, 1.8 and 2.0 ton
- **Masts**
Simplex, Duplex, Triplex and Quad
- **Max. Lift Height**
8075 mm
- **Battery**
550–750 Ah

SCT 6200 Three-Wheel Counterbalance

- **Load Capacity**
1.3, 1.6, 1.8 and 2.0 ton
- **Masts**
Simplex, Duplex, Triplex and Quad
- **Max. Lift Height**
7490 mm
- **Battery**
330–750 Ah

Comfort and control. A personal approach.

Life can be challenging for operators. They're on and off the truck all day, inside and outside, in all kinds of weather. Rough ground, tight spaces, poor lighting and traffic make it tougher. They need a truck that makes the job easier, and the SC 6200 Series delivers. Operators have open sight lines, more headroom and simplified ingress and egress. Cabin, control and accessory options can be tailored to fit the task.

Cabin Options

Weather impacts performance. Take a personal approach and get more done with Crown's cabin options. The partial cabin includes a windshield with wiper, a roof with reading light and rear panel with wiper. Add soft doors with embedded magnets when a simplified enclosure suffices. For the ultimate in all-weather protection, the hard cabin option features clear view doors, 2-way sliding windows and heater option.

Partial Cabin

Soft Cabin

Hard Cabin

Shown with hard cabin installed.

Visibility Window

With visibility out the front, out the sides or to the rear, operators gain a clear advantage on the SC 6200 Series. And it's the same with or without a cabin.

D4 Armrest

Features easy, one-handed adjustment of up/down and fore/aft positioning. For use with manual levers or with one of four integrated hydraulic control options.

Fingertip

Intuitive control of hydraulic and truck functions with minimised hand movement.

Mini-Lever

Variable spaced controls allow for precision movement with a pinch grip.

Dual-Lever

Smooth blending of hydraulic functions with ample spacing of controls for glove use.

Combination-Lever

Well-spaced dual-lever for main operation and mini-levers for finer control of third and fourth functions.

Traction Control Options

Single pedal traction control with brake (left) or optional dual pedal traction control with brake (right) are available to match operator preference.

Robustness. Of course. It's a Crown.

The Crown brand is all wrapped up in robustness. You can see it in the smallest details because we engineer our lift trucks for exceptional reliability. On the SC 6200 Series, you see robustness from the solid box frame to the drive units to the rigid I-beam mast and everything in between. You get steel where it counts and engineering focused on the long term.

Mast/Integrated Sideshifter

Stable loads improve operator confidence. Crown uses nested I-beam masts to minimize longitudinal, lateral and torsional flexibility. Reliability and durability are also improved with Crown's integrated sideshifter featuring a carriage that shields the cylinders.

H Class Traction Motors

Heat is one of the biggest threats to motors and the ability to keep a truck running when loads are heavy and ambient temperatures are up. While others provide thermal-cutback settings to protect from meltdown, Crown designs and builds motors to a high thermal rating to handle the heat.

Chassis Construction

It's a tough, busy world where collisions sometimes happen. You need a frame that can stand up to this harsh reality. Crown's fully enclosed box frame and symmetric design helps protect against frame distortion caused by impacts. It's a solid base that keeps your truck aligned for longer useful life.

3-Wheel and 4-Wheel Steer Axles

Steer axles take a beating over rough surfaces and dock boards. To withstand these stresses, the SC 6200 Series steer axles feature massive steel/cast-iron construction and heavy-duty tapered roller bearings.

Safety. Work from a position of strength.

Ramps, uneven surfaces, racking, product variations and traffic present an ever-changing, risk-filled environment for operators and equipment. That's why Crown created the Intrinsic Stability System. It's a proactive approach to stability that provides more control.

The intelligent system uses integrated sensors and controllers to constantly monitor and control key functions and movements. It leverages the truck's inherent engineered stability to optimise safety and performance. In addition, our mast staging and cushioning system help operators keep control of the moving load at all times.

Tilt Speed Control

System-controlled tilt speeds reduce the risk of a truck tipover.

2-Degree Lift Zone

With forks above free-lift height and with a load, forward tilt is limited to 2 degrees.

FREE-LIFT HEIGHT

Full Tilt and Lift Speed Zone

Below free-lift height, operators have a full range of forward tilt and full tilt speed.

Ramp Speed Control

Operators maintain constant speed on ramps with the assistance of the system's intelligent control.

Speed Reduction in Turns

The on-board intelligence assists the operator with control based on load weight, lift height, steer angle and truck speed.

Hydraulic Speed Control

Tilt/accessory speeds are limited automatically based on fork height and load weight.

Weight Matters

The SC 6200 Series puts more mass where it counts with heavy use of steel, plus a stability-enhancing counterweight that exceeds required standards.

Lighting Options

Long-life LED lights make a dramatic difference in productivity and performance. On the SC 6200 Series, you have a range of lighting options for both inside and outside applications. They're designed to help operators see more clearly, and to make the truck more visible to others.

LED Lights

- Tail light
- Backup light

Interior LED Dome Light

LED Flashing Light

LED Travel Package Lights

- Tail light
- Brake light
- Turn indicators
- Reflectors

Rear LED Work Light

Front LED Work Lights

LED Travel Package Lights

- High/Low beam
- Turn indicators

Serviceability. Benefits of a long-running outlook.

Reliability and ease of service start in the design process at Crown. Our trucks last because they're built for the long haul. That also explains our easy service access, expert diagnostics and quick battery service. It's all part of the design to keep your truck moving.

Fast-Track Access

The magnetic storage organizers are removed and the seat deck swings up for top access. Side panels and floorboard quickly provide further access, even with a cabin. Inside, components are spaced and positioned so that service is accomplished in minimal time.

Access 1 2 3®

Crown's Access 1 2 3 technology gives you instant, on-board diagnostics. There's no hassle of hooking up a handset or laptop. The easy-to-understand display communicates event codes, while a built-in multimeter can be used to pinpoint the origin of faults. Repairs are faster, too, with no need to swap out components in trial-and-error testing. Service engineers simply identify suspect components and test their functionality through the display.

V-Force® Lithium-Ion

Lithium-ion technology is revolutionising the electric forklift industry to deliver game-changing advantages.

Low Maintenance, Lower Costs

Eliminates the time consuming tasks associated with lead-acid batteries including battery changes, watering or special battery rooms.

No Battery Swapping

One lithium-ion battery can handle one shift or multiple shifts with no need for extra batteries or the downtime required to change them.

Increased Safety

Zero emissions during charging mean no gassing and no exposure to harmful acids and vapors. A multi-level safety architecture provides complete protection during use.

Longer Life

Lithium-ion batteries outperform lead-acid batteries saving replacement and service costs over time.

Improved Efficiency

Achieve greater efficiency, higher sustained voltage properties, and a higher rate of return during any charging event.

True Opportunity Charging

Increase uptime with periodic opportunity charging, enabling one lithium-ion battery to achieve more runtime in a 24-hour period.

More uptime for your money

Crown's integrated approach combines truck feedback with diagnostics, Crown-made parts and dedicated service teams to provide more uptime and a low total cost of ownership.

InfoLink is a wireless operator and fleet management solution that puts the power of accurate, up-to-date business metrics right at your fingertips.

Crown's InfoPoint on-truck component maps provide service engineers with vital information to quickly, accurately and easily resolve issues without additional wiring diagrams and schematics.

Crown's Integrity Service and Integrity Parts solutions ensure long-term truck performance by matching trained service engineers with Crown-made parts for long-lasting performance. That's a major difference with Crown.
