

CROWN

C-G

3,500 - 5,500 kg Capacity

LPG Counterbalance Lift Truck

Robust and Reliable

With load capacities from 3,500 to 5,500 kg, Crown's C-G Series LPG-powered counterbalance forklifts deliver powerful and fuel-efficient performance whilst providing excellent value. The C-G Series also complies with the latest EU 5 exhaust emission regulations.

Its outstanding visibility, durable design and comprehensive range of standard and optional features are designed for safe operation in virtually any IC material handling environment.

Outstanding Comfort and Control

Crown's C-G Series LPG-powered counterbalance forklifts are designed for comfort, confidence, stability and safety, so operator productivity can keep pace with lift truck performance. Enhanced comfort features reduce operator fatigue and strain, even in the most demanding applications.

Ergonomic Controls
Available with manual levers.

Intuitive Instrument Panel
Easy-to-read 5-inch colour display shows operators important information. Changes to performance settings are simple and quick.

Mast Lowering Interlock (optional)
The hydraulic locking system prevents lowering and tilting of the mast when the forklift is not in operation (ISO 3691 compliant).

Operator Sensing System
An operator must be seated for the forklift to function.

Tilt Cylinder Covers
The covers protect the tilt cylinders against unexpected shocks and provide extra space for the operator.

Anti-Slip Step Plate
The large anti-slip step plate makes it easy to get on and off the forklift, even in extreme weather conditions.

Modular Cabins (optional)
Four individually adaptable cabin layouts are available for protection in different conditions

- Roof only
- Roof and front windshield
- Roof, front windshield and rear window
- Hard cabin, also available with heat and air conditioning

Premium Adjustable Seat (optional)
A full-suspension Grammer comfort seat can accommodate individual operator preferences.

Accurate Pedal Power
The inching pedal design increases operator control while comfort is ensured through the use of an anti-slip pedal covering.

Crown's Proven Service and Support

Crown support begins long before the lift truck leaves the factory. Our integrated approach to service provides an exceptional user experience to our customers – before, during and after the sale.

Easy Mounting/Dismounting of LPG Tank

The specially designed LPG cradle smoothly swings the tank out and down from its position on the counterweight, providing operators with an easier method for mounting and dismounting LPG tanks.

Easy to Access Components

Toolless panel removal and generous hood opening allow for quick checks and easy access to serviceable components.

Virtually Maintenance-Free Oil-Cooled Disc Brakes

Fully enclosed, oil-cooled dual disc brake assemblies prevent contamination for exceptional stopping power and long life. The virtually maintenance-free discs are submerged in oil, keeping them cool and limiting wear.

Dual-Element Air Cleaner

A heavy-duty dual-element air cleaner provides advanced protection against engine contamination. The elements are easily accessible through a clip-on cover.

3.8 Litre Engine

Well-proven and reliable engine and components provide high-end torque at low engine rpm and reduced fuel consumption. It delivers great performance and reliability.
