

WAREHOUSE SOLUTIONS

LET US HELP YOU DESIGN YOUR SUCCESS
MAXIMISING SPACE AND INCREASING PRODUCTIVITY

Your Integrated Solutions Provider

New and Used Trucks

Crown forklifts provide long-term value and the confidence of knowing that you've made the best business decision. Our design approach focuses on operator productivity, safety and product lifespan.

Forklift Rental

Whether you need a forklift for one day or five years, Crown has a solution for you. We have you covered for seasonal peaks, stock-takes, backlogs and special projects with short- and long-term rental options that fit your specific requirements.

Forklift Service

Crown's Integrity Service System tracks all the features that work together to create a complete system of service such as response times and service and parts availability. Then our trained and knowledgeable service engineers get the job done, offering a choice of service plans tailored to your needs.

Forklift Parts

Our spare parts are designed, manufactured and tested to Crown standards in order to contribute to the overall performance and long-term value of our forklifts. While Crown spare parts may cost slightly more initially than look-alike parts, they typically last longer.

Fleet Management

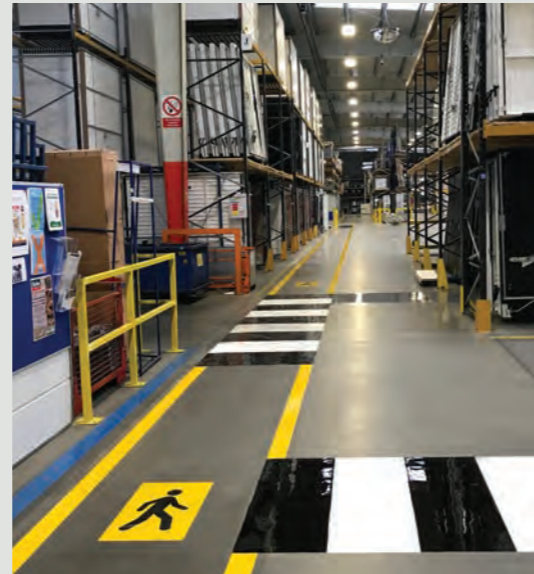

Crown's tried-and-tested fleet management tools enable fleet managers to identify issues, set goals and measure success, from helping them make better decisions to giving them the big-picture view to improve the bottom line.

Operator Training

Crown offers various forklift training programmes that can help optimise employee and lift truck performance and assist employers in fulfilling their requirement to train their operators in the safe use of powered forklift trucks.

In addition to delivering innovative lift trucks and material handling equipment solutions, Crown also offers warehouse solutions – design/planning along with equipment and supplies – to optimise your operations.

At Crown, we can provide extra value in your material handling solutions. Let Crown take the time to design, plan and implement your customised solution, allowing you to remain focused on your business objectives.

Advantages you can expect from Crown include:

- Extensive expertise covering all aspects of material handling
- Customised solutions focused on your specific facility needs
- Quality products from local, national and global manufacturers and suppliers
- Flexibility to choose solutions based on scheduling, space and cost constraints
- Solutions planning, including optimal workflow and productivity
- Superior service in delivery, installation and ongoing support
