

# Save Time And Money Using the V-Force® Battery Watering System.

- Reduces filling time by up to 75 percent when compared to a watering gun.
- Extends battery life by preventing over and under watering.
- Unique push-fit tubing resists kinks or crushing. With a small radius, it fits even the smallest cells easily.
- Valves fill all cells to the appropriate level and rotate for easy tube alignment.
- Wide range of operating pressure, 3-45 psi.
- System is virtually maintenance free.

**Makes  
battery  
watering  
easy and  
affordable.**

## Two float valve options available

### 300225-001

**Highly Visible Fill Level Indicator**  
Viewable from top and side

**Push-fit Tubing Ports**

- Secure tubing by simply pushing tubing into ports.
- No barbed fittings to break.

**5-YEAR WARRANTY**

**Snap-Fit Base**

No separate adapter required

**One Size Fits All Design**

- Fills all cells to appropriate level
- Multiple float sizes not needed

The **300225-003** V-Force Slim Valve is specifically designed to fit in the narrow spacing between the straps of a Crown Battery Max-Haul or a GNB Flat-Plate battery.

**P.N 300225-003**
