

Comprehensive Warehouse Solutions from Start to Finish

Whether you're expanding your warehouse, building a new one or just trying to fit more storage in your current space, Crown's Warehouse Solutions can deliver on multiple facets of your warehouse project. From planning and design, to forklifts and motive power, to racking and warehouse products, Crown brings it all together with end-to-end project management and precision implementation designed to help achieve your business goals.

All of the Components of a Complete Warehouse Solution

Each warehouse project can consist of many moving parts, and each of those has its own set of complexities. Crown understands the intricacies of the project components and also provides the expertise to fit them together to achieve the greatest benefit.

Warehouse Design

Crown's team of warehouse professionals apply industry knowledge and extensive material handling experience to transform each customer's vision into reality – to improve throughput, enhance efficiency and safety and reduce warehousing costs. Usage patterns, critical workflows, facility requirements and resource allocation are fully analyzed to develop an informed recommendation.

Racking and Storage

Choosing the right rack system can help make the best use of available warehouse space and streamline handling of inventory. Crown's specialists analyze materials and workflow to recommend the right combination selected from a wide variety of storage systems to enhance operational efficiency.

Forklifts and Motive Power

Crown's team can help pair racking systems with the right forklifts for pallet moving, order picking and specialized tasks to create an integrated approach to efficient movement, storage and retrieval of material. To keep it all moving, Crown offers V-Force® Motive lead-acid and lithium-ion batteries and hi-frequency chargers, which deliver flexible, reliable performance.

Warehouse Products

To make a warehouse complete and well organized, Crown Warehouse Solutions offers an abundant catalog of warehouse products, including storage equipment, decking, netting, protective barriers, safety and personal protective equipment and directional labels and signs.

Total Project Management Focused on Your Objectives

A successful project is more than the sum of its parts. How those parts are assembled, coordinated, installed and commissioned can make the difference between a good result and a great result. Let Crown manage the details of scheduling, site prep, surveys, permits and documentation so you can focus on taking care of business. You'll have a single point of contact that will manage all aspects of your project from start to finish, with a consistent focus on achieving your business goals.

Key Advantages of Crown Warehouse Solutions

- ✔ Single source supplier and a dedicated project contact
